

# OPTI-SKIM

## CALF MILK REPLACER

- OPTI-SKIM contains an extremely high level of skim milk powder which delivers high quality protein levels to push daily liveweight gains from an early age.
- Inclusion of a high level of skim milk powder at 60%, achieves the desired clotting effect in the abomasum. This gives calves a slow release of energy and protein throughout the day as the skim milk powder is absorbed slowly through the abomasum, especially in the early stages of life.
- Inclusion of Triple Shield Protection which comprises of three components:
  - » Includes a combination of enzymes which increases the growth of intestinal microflora.
  - » Sodium Bicarbonate is used to keep the acid balance healthy in the newborn calf.
  - » Sodium Butyrate is included to ensure the feed conversion efficiency in the abomasum is maximised.

This combination reduces the incidence of digestive scours and minimises the growth of harmful bacteria including E-coli, Clostridia and Salmonella.
- Achieves high performance with dairy replacement stock and beef calves in intensive rearing systems.
- OPTI-SKIM is an easy mixing calf milk replacer, ideal for once a day, twice a day feeding and computerised calf rearing systems.

### Twice a day feeding rates/calf

Days of Age	Morning		Evening	
	Water	Powder	Water	Powder
0-4	Colostrum		Colostrum	
5-10	2 Litres	200g	2 Litres	200g
11-Weaning	2.5 Litres	300g	2.5 Litres	300g

With computerised feeding systems, optimal performance is achieved at an inclusion rate of 125g/L.

### Once a day feeding rates/calf

Days of Age	Morning		Evening	
	Water	Powder	Water	Powder
0-4	Colostrum		Colostrum	
5-8	1.5 Litres	200g	1.5 Litres	200g
9-13	2 Litres	250g	2 Litres	250g
14-16	2 Litres + 400g			
17-20	2.5 Litres + 500g			
21-Weaning	3 Litres + 600g			

- Shelf Life: 18 months from date of manufacture.
- Available in pallets of 20kg polylined paper bags.
- Store in a cool dry place.
